

Contents

Chapter 1	Introduction	1
1.1	Spatial data analysis	1
1.2	Purpose of the book	2
1.3	Key concepts	3
1.4	Structure of the book	4
	Further reading	5
Chapter 2	Key concepts 1: GIS	6
2.1	Introduction	6
2.2	Data and data models	7
2.2.1	Raster data	7
2.2.2	Vector data	8
2.2.3	Topology	9
2.2.4	Rasters and vectors in GIS software	11
2.3	Databases	11
2.3.1	Database management	12
2.3.2	The Geodatabase	12
2.4	Referencing systems and projections	12
2.5	Georeferencing	13
2.6	Geocoding	13
2.7	Spatial scale	14
2.8	Spatial data collection	15
2.8.1	Spatial sampling	15
2.8.2	Secondary data sources	16
2.8.3	Remote sensing	16
2.8.4	Ground survey	17
2.9	Sources of data error	18
2.9.1	Uncertainty in spatial data analysis	19
2.10	Visualizing spatial data	19
2.11	Querying data	21
2.11.1	Boolean logic	21
	Summary	23
	Further reading	23

Chapter 3	Key concepts 2: statistics	24
3.1	Introduction	24
3.2	Univariate statistics	25
3.3	Multivariate statistics	31
3.4	Inferential statistics	39
3.5	Statistics and spatial data	41
	Summary	42
	Further reading	42
Chapter 4	Key concepts 3: spatial data analysis	43
4.1	Introduction	43
4.2	Distances	44
4.3	Measuring lengths and perimeters	45
4.3.1	Length of vector features	45
4.4	Measuring areas	45
4.4.1	Areas of polygons	45
4.5	Distances from objects: buffers	47
4.5.1	Vector buffers	47
4.5.2	Raster proximity	47
4.6	Moving windows: basic statistics in subregions	48
4.7	Geographical weights	50
4.8	Spatial dependence and spatial autocorrelation	55
4.9	The ecological fallacy and the modifiable areal unit problem	60
4.10	Merging polygons	63
	Summary	63
	Further reading	64
Chapter 5	Combining data layers	65
5.1	Introduction	65
5.2	Multiple features: overlays	65
5.2.1	Point in polygon	66
5.2.2	Overlay operators	67
5.2.3	'Cookie cutter' operations: erase and clip	69
5.2.4	Applications and problems	70
5.3	Multicriteria decision analysis	71
5.4	Case study	72
	Summary	74
	Further reading	74

Chapter 6	Network analysis	75
6.1	Introduction	75
6.2	Networks	75
6.3	Network connectivity	76
6.4	Summaries of network characteristics	79
6.5	Identifying shortest paths	80
6.6	The travelling salesperson problem	83
6.7	Location–allocation problems	83
6.8	Case study	84
	Summary	85
	Further reading	85
Chapter 7	Exploring spatial point patterns	86
7.1	Introduction	86
7.2	Basic measures	88
7.3	Exploring spatial variations in point intensity	89
7.3.1	Quadrats	89
7.3.2	Kernel estimation	93
7.4	Measures based on distances between events	97
7.4.1	Nearest-neighbour methods	97
7.4.2	<i>K</i> function	99
7.5	Applications and other issues	102
7.6	Case study	102
	Summary	105
	Further reading	105
Chapter 8	Exploring spatial patterning in data values	106
8.1	Introduction	106
8.2	Spatial autocorrelation	106
8.3	Local statistics	107
8.4	Local univariate measures	107
8.4.1	Local spatial autocorrelation	110
8.5	Regression and correlation	113
8.5.1	Spatial regression	113
8.5.2	Moving window regression	114
8.5.3	Geographically weighted regression	115
8.6	Other approaches	123

8.7	Case studies	124
8.7.1	Spatial autocorrelation analysis	124
8.7.2	Geographically weighted regression	125
	Summary	127
	Further reading	128

Chapter 9 Spatial interpolation 129

9.1	Introduction	129
9.2	Interpolation	129
9.3	Triangulated irregular networks	130
9.4	Regression for prediction	132
9.4.1	Trend surface analysis	133
9.5	Inverse distance weighting	134
9.6	Thin plate splines	136
9.7	Ordinary kriging	140
9.7.1	Variogram	141
9.7.2	Kriging	146
9.7.3	Cokriging	150
9.8	Other approaches and issues	150
9.9	Areal interpolation	150
9.10	Case studies	152
9.10.1	Variogram estimation	152
9.10.2	Interpolation	153
	Summary	154
	Further reading	154

Chapter 10 Analysis of grids and surfaces 155

10.1	Introduction	155
10.2	Map algebra	155
10.3	Image processing	157
10.4	Spatial filters	158
10.5	Derivatives of altitude	160
10.6	Other products derived from surfaces	162
10.7	Case study	168
	Summary	170
	Further reading	170

Chapter 11	Summary	171
11.1	Review of key concepts	171
11.2	Other issues	172
11.3	Problems	172
11.4	Where next?	173
	Summary and conclusions	174
References		175
Appendix A	Matrix multiplication	180
Appendix B	The exponential function	181
Appendix C	The inverse tangent	182
Appendix D	Line intersection	183
Appendix E	Ordinary least squares	188
Appendix F	Ordinary kriging system	191
Appendix G	Common problems in spatial data analysis	202
